JOLT USB Mini Light

## SDS EXEMPTION NOTICE:

The battery powered lights, and the batteries they contain, covered in this document are exempt articles and are not subject to the OSHA Hazard Communication Standard requirement. This sheet is provided as a service to our customers.

Safety Data Sheets (SDS) are a sub-requirement of the Occupational Safety and Health Administration (OSHA) Hazard Communication Standard, 29 CFR Subpart 1910.1200. This Hazard Communication Standard does not apply to various subcategories including anything defined by OSHA as an "article." OSHA has defined "article" as a manufactured item other than a fluid or particle; (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which under normal conditions of use does not release more than very small quantities, e.g. minute or trace amounts of a hazardous chemical, and does not pose a physical hazard or health risk to employees.

Because all of our battery powered lighting products and the batteries they contain are defined as "articles", they are exempt from the requirements of the Hazard Communication Standard; hence an OSHA SDS in accordance with the Global Harmonized System (GHS) is not required.

## 2. HAZARDS IDENTIFICATION

### Lithium Ion Batteries Contained in Equipment, UN3481

**CAUTION:** LITHIUM BATTERIES INSIDE. This equipment contains a Secondary (Rechargeable) Lithium battery. The battery is sealed in the equipment and cannot be removed or replaced unless the equipment is damaged or abused. Do not damage or mishandle the packages. If package is damaged, flammability hazard may exist; equipment must be quarantined, inspected, and repacked.

**CAUTION:** Batteries inside the equipment can explode or leak if heated, disassembled, shorted, recharged, exposed to fire or high temperature or inserted incorrectly. Do not remove batteries from equipment. Do not carry batteries loose in your pocket or purse. Keep this equipment and the batteries contained inside away from children. If swallowed, consult a physician at once. Under certain misuse conditions and by abusively opening the battery, exposed lithium can react with water or moisture in the air causing potential thermal burns or fire.

**Physical Appearance:** The equipment contains a small rectangular shaped battery pack. The battery and its contents present the hazard. The battery is sealed inside the equipment and can only be removed if the equipment is damaged or abused. The battery is not replaceable and should never be removed from the equipment.

#### Battery Description:

Battery Type: PL421220/60

Chemistry: Lithium Cobalt Oxide (LiCoO<sub>2</sub>)    Rated Capacity: 60 mAh    Nominal Voltage: 3.7 V

Watt-hours (Wh) = 60 mAh x (1 A/1000 mA) x 3.7 V = 0.22 Wh

"Equivalent" Lithium Content = 60 mAh x (1 A/1000 mA) X (0.3 grams/A)= 0.02 grams
